```python
#PYTHON PROGRAM TO READ CONTENT OF FILE "Elections.txt" AND PRINTING THE LINES WHICH
CONTAINS "Python" word

word='vote'
with open("Elections.txt","r") as file:
    content=file.readlines()
    for line in content:
        words=line.split()
        if word in words:
            print(line)
    file.close()

OUTPUT

CONTENT OF FILE

In an election many people vote to choose their representative
The candidate getting the maximum share of votes stands elected.
Normally, one person has to vote once.
The process of voting may vary with time and region.
